

IDENTIFICATION PLATES FOR OIL PRODUCT LINES AND DISTRICT HEATING LINES

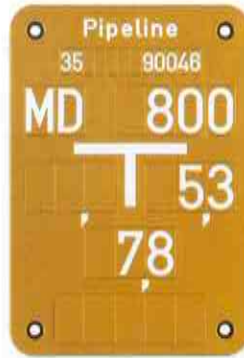

In brief :

- They are made of a bicolour injection-moulded plate in ASA Thermoplast (Luran S), which can take extreme weather, temperatures and shocks.
- Thanks to their absolutely non-reflecting matt surface, they allow easy reading, even at a distance.
- They are firmly fastened by 4 countersunk stainless steel (V2a) screws in a firm, flat mount.
- They can be fitted either with SGM inserts or with all inserts currently produced by other manufacturers.

Oil products version :

200 x 140 mm

140 x 100 mm

Please note : All signplates and inserts can be printed to your own specifications (e.g. in English). Multicolour printing also possible.

Heating lines version :

Backing plate :

All oil-products or heating lines identification plates can be used with an optional backing plate.

The backing plate increases stability and prevents unauthorized removal of the inserts. (see below)

The backing plate is countersunk in the signplate and therefore invisible. Signplate and backing plate together constitute a tough, compact and warp-free unit.

**Increased reliability :
Camouflaged socket head**

SGM uses stainless steel (V2a) hexagonal socket screws to hinder unauthorized removal (nevertheless other screws can be used). Practical plastic caps can effectively camouflage the screw heads.

Further identification plate equipment :
(see separate leaflet)

Inserts :

- digits
- letters
- symbols
- special signs

Available in selections or as complete sets in practical sorting boxes.

Fastening elements :

- Aluminium fastening plates for post or wall mounting.
- Aluminium posts
- Aluminium fastening clamps for fixing fastening plates to posts.
- Screws, steel straps.
