

INSERTS FOR IDENTIFICATION PLATES

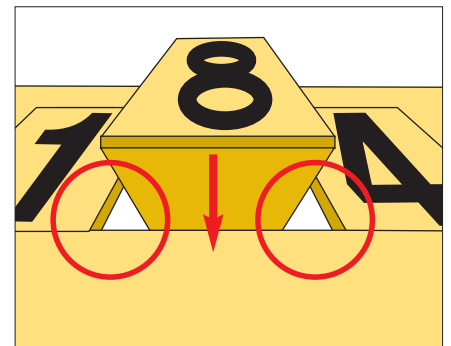

In brief :

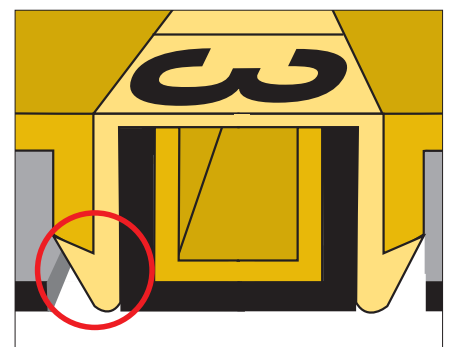

- Our bicolour injection-moulded inserts can take extreme weather, temperatures and knocks. In ASA Thermoplast (Luran S).
- The SGM insert's fastening clip has sloped ends which facilitate its positioning and insertion. (see drawing)

- The bevelled edges of the fastening clip centres each piece on its insertion and ensures a flush fit to the next. (see drawing)

- The barb of the fastening clip locks onto the corresponding rim of the sign plate.

Colour combinations :

All inserts are available in the following colour combinations : blue/white, green/white, white/black, yellow/black, brown/white, red/white, orange/white.
