

Press-Ring-Seal

- ✓ quickly installed
- ✓ absolutely leakproof
- ✓ all-purpose
- ✓ against pressing water

For sealing the annular space between metal pipes/plastic pipes/fresh water pipes/sewage pipes/etc. and boreholes/wall sleeves/cable tubes.

Sealing is effected by pressing the rubber element via two stainless steel pressure plates with screws together.

Summary

- Press-ring seal closed or divided sealing kit
- For sealing the annular space between boreholes/casing tubes and pipes or cables
- Rubber width: 30 mm / 40 mm / 60 mm
- Material rubber form-ring: SBR / EPDM
40 ±5° Shore black, gas and water pressure tight up to 5 bar, acc. to DIN 1988, 18336/37, DIN 18195, DVGW G459/I and VP 601
- Material metal parts: pressure plates stainless steel V2A or V4A, clamp screws and washers stainless steel V4A
- Dimensions on request
